History of Yellowstone

It took centuries for Euro-Americans to find it. It took almost 70 years to explore it and establish it as a national park. Producer Jack R. Hubbell presents a series which explores the history of Yellowstone National Park.

► The Discovery

7pm Tuesday, June 5 Also 6/7 1am

In this program, explore with the early explorers and see sites much the same as they did. We'll hear some of their thoughts about this nature wonderland, a place where "waterfalls spout backwards" according to mountain man Jim Bridger. As the federal government, through the Park Service, decides the future of Yellowstone Park, we can learn what the men of the 1800s envisioned for this showcase of nature's wonders. The program covers the years 1807-1886.

► Dudes and Sagebrushers

8pm Tuesday, June 5 Also 6/7 2am

In this double volume episode, spanning the period from 1872 to present day, we uncover the early history of camping, hotels, rangers and transportation within the park. The oldest surviving hotel of all the national parks is found in Yellowstone; built in 1890, it still provides comfort to weary travelers. We also reveal the secrets of the Old Faithful Inn and one of the hotels built in Yellowstone that was a mile in circumference.

► A Realm Untamed

8pm Tuesday, June 12 Also 6/14 2am

The History of Yellowstone's bears, wolves, and bison are documented. Supplemented with rare historical film and photographs of roadside begging bears and early bison roundups. History of the thermal areas is also explored.

Bell Ringer: The Invisible Brain Injury

> **Airs 8pm Monday, June 11**
Also 6/13 4am

Every year, as many as 3.8 million brain injuries occur in athletics in the United States, and they are more common among children and students than star athletes. Concussions are often talked about in professional football, but they can be a problem in any sport, and at any age. *Bell Ringer: The Invisible Brain Injury* dives into the complexities of the injured brain, examining what occurs in the brain during a concussion, how researchers are studying physical impact and neurological injuries, and the safe protocols for returning to play. Through eye-opening interviews with former professional players, including women's soccer legend and two-time World Cup Champion Michelle Akers and three-time Super Bowl Champion Monte Coleman (both of whom suffered multiple concussions during their careers), as well as medical experts and renowned researchers, the documentary examines the short-term effects and long-term risks of concussions, raises awareness of the issue, and discusses the best ways to prevent them altogether.

GREAT PERFORMANCES AT THE MET

Tosca

➤ **Airs 8pm Friday, June 15**
Also 6/18 3am

Sir David McVicar's ravishing production of Puccini's classic *Tosca*, starring Sonya Yoncheva as the title prima donna alongside Vittorio Grigolo as her revolutionary artist lover Cavaradossi and Željko Lucic as chief of police Scarpia.

This production is set in 1800 Rome, where painter Cavaradossi helps the escaped political prisoner Angelotti hide from the police while his jealous lover, opera diva Floria Tosca, suspects him of being unfaithful. The sadistic chief of police Baron Scarpia, who is hunting the fugitive, longs for Tosca and vows to bend the singer to his will after arousing her jealousy. Scarpia suspects Cavaradossi of aiding the fugitive and has the artist arrested and tortured. A frightened Tosca reveals the political prisoner's whereabouts, but when Cavaradossi cries out in defiance of tyranny, he is carried away to be executed. In exchange for her lover's freedom, Tosca promises her devotion to Scarpia, then kills him. Tosca informs Cavaradossi that he is free now, but before departing the city he must go through a mock execution, which ends tragically. Emmanuel Villaume conducts. Isabel Leonard hosts.

Scientists Hannah Morris and Alia Gurtov excavate bone fragments of a new human-oid species at Rising Star in South Africa. A new Nova special follows the expedition.

Dawn of Humanity

➤ **Airs 8pm Wednesday, June 20**

Also 6/22 1am, 4am; 6/24 mdnt; 6/25 noon

NOVA and National Geographic present exclusive access to a unique discovery of ancient remains. Located in an almost inaccessible chamber deep in a South African cave, the site required recruiting a special team of experts slender enough to wriggle down a vertical, pitch-dark, seven-inch-wide passage. Most fossil discoveries of human relatives consist of just a handful of bones. But down in this hidden chamber, the team uncovered an unprecedented trove—so far, over 1,500 bones—with the potential to rewrite the story of our origins. They may help fill in a crucial gap in the fossil record and tell us how Homo, the first member of the human family, emerged from ape-like ancestors like the famous Lucy. But how did hundreds of bones end up in the remote chamber? The experts are considering every mind-boggling possibility. Join NOVA on the treacherous descent into this cave of spectacular and enigmatic finds, and discover their startling implications for the saga of what made us human.

Teams are given 48 hours to come up with an idea, create a prototype, marketing materials, and a pitch.

MAKE48

► **Airs Fridays 9:30am and 3:30pm on MontanaPBS Create**

MAKE48 is an exciting look at the entire invention process from idea to store shelf. In this unique series, teams compete to develop a new product idea, plan it, make a prototype and pitch it—all in just 48 hours. In the first four episodes, the viewer is immersed in the action as the invention process unfolds. With the constant pressure of the “ticking clock,” the teams brainstorm, design and build their ideas in order to pitch a working prototype to a team of industry-savvy judges. Industry A-listers roam the competition floor and give advice on all facets of product design and development, and a panel of industry experts weigh in on the prototype’s function and marketability. At the end of the second day, the field will be narrowed down to just three teams who advance on the path to market. Judges include: buyers from the home shopping channel QVC, Squatty Potty’s Judy Edwards (a Shark Tank mega-success), and Wet and Forget’s Adam Smith.
